## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 7, in so far as can be understood, are being rejected under 35

U.S.C. 102(b) as being anticipated by IBM Technical Disclosure Bulletin NN85046791.

As to claims 1-3, IBM NN85046791 discloses a thick film integrated decoupling capacitor with redundancy having all of the claimed subject matter. Referring to figure 1, a decoupling capacitor 12 electrically connected to a surface of conductor. The device has a circuit formation surface 10 on which a plurality of power supply lines and a plurality of ground line connection lines are connected to. The conductors are connected to the power supply pads and the ground line connection pads (not shown). Connection pads are an inherent feature. The power supply line connection pads are alternately disposed along an edge of the circuit formation

surface of the device. There are solder bumps connecting the ground line connection pad and the power supply connection pad to the conductor.

The amended claim 1 does not overcome the initial rejection. Each of the conductors is electrically connected to either one of the power supply connection pads or one of the ground connection pads.

### ***Claim Objections***

3. Claims 8-10 and 14-15 are being objected to as being dependent upon a rejected base claim.

### ***Allowable Subject Matter***

4. Claims 20-33 are allowed.

### ***Conclusion***
